INTERIOR SOLUTIONS

YAKKA

FLOOR AND DESK SCREENS

Modern, flexible spaces.

A creative vibe that encourages people to focus and share ideas.

As designers, creating a functionally sound, aesthetically stunning space is always the goal, but it may not always be easy finding the right products that offer both. That's where FUNC comes in. The idea behind FUNC is simple enough: attractive solutions that define and appropriately divide spaces while reducing visual and acoustic distractions. But our team knows that this simple idea comes with a series of complexities, such as scale, form, utility, functionality, affordability, and the list goes on.

YAKKA

Yakka's modern form ships flat and assembles quickly, without tools. A design so lightweight and versatile you can put it in any workspace yourself. No mechanical connection required. You're adding more, and somehow seeing less, thanks to Yakka's functional utility which frees valuable work surface space. A real beauty how that works, not to mention the increased privacy and well-organized office space that'll be your company to keep. Ambient noises will be reduced and you can reconfigure to support whatever level of privacy you're feeling.

DESIGNER PAUL JAMES

Paul James is an award winning designer and inventor with a reputation for both right and left-brain insight. He entered college to study engineering and emerged with degrees in math and economics. A graduate degree in industrial design lead to leadership positions for several A list furniture companies. In 2002 he opened his own consultancy in Minneapolis specializing in product design and new venture start-ups. His process is equal parts head and hand, CAD and crayon, coffee and cocktail. Whether designing furniture, outdoor gear, or parametric fabrication systems, James' mantra is reason in every function and art in every detail.

AVAILABLE COLORS AND FINISHES

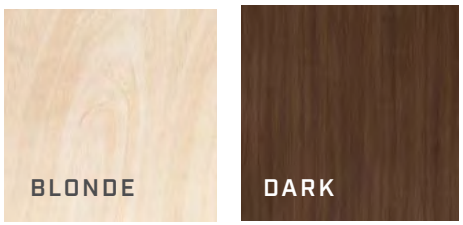

Yakka is constructed from the highest quality polythylene terephthalate or P.E.T. An ideal material for reducing ambient noise and sound within noisy environments.

Yakka is available with light or dark wood support base. A wood color selection must be made when ordering.

FREESTANDING SCREEN

This floor screen with a wood base turns any open-space setting into a visual privacy haven. With a lightweight design, user control is maximized, and reconfiguring to support the level of privacy you want is quick and easy. Yakka's compelling form suggests movement while standing still. A visual stand-out that's also structurally supportive, stable, and sound-reducing. So you can focus on the beauty of exactly what's in front of you.

DESK SCREENS

Walls can take a long time to build, but the Yakka desk screens take only moments to add to any space. Ships flat, assembles quickly, no tools needed, and all the privacy and noise reduction you could ask for. Tight spaces get a new, more open look. With an integrated power and cable and management system unsightly cords and cables still get to do their job, without you even knowing they're there. "Smart" shelf? Check. Designed to support a wide range of electronic devices and personal items, Yakka's desk screen bumps up visual and acoustic privacy, helps you stay focused and organized at the task at hand, and looks stylish while doing it.

CLEANING & DISINFECTING

They say cleanliness is next to godliness. We understand the need to feel safe and secure within a crowded environment. That's why FUNC endorses cleaning practices that protect our customers. Vacuum or use compressed air to remove dust that may collect over time. The use of a diluted bleach solution (one cup of bleach to five gallons of water) may be used to clean the felt surfaces of FUNC. Our solutions are not only visually compelling, they are also incredibly durable.
