
Torsion®
Tandem Seating
comfortable | versatile | easy to maintain
KI
Furnishing Knowledge®

Create comfortable multiple seating arrangements that fit your space. Sturdy beam-mounting allows various combinations of seats and in-line or corner tables to meet your public space needs. Choose the number of elements per unit, determine whether in-line or corner tables are desired, then specify seats in straight runs, L-shapes, or U-shapes.

Beam construction allows for easy cleaning, installation and routine care. All poly seats are ideal for hard use areas.

A patented mechanism gradually increases resistance over a full 12-degrees of back flex to provide incredible comfort for all Torsion seating.

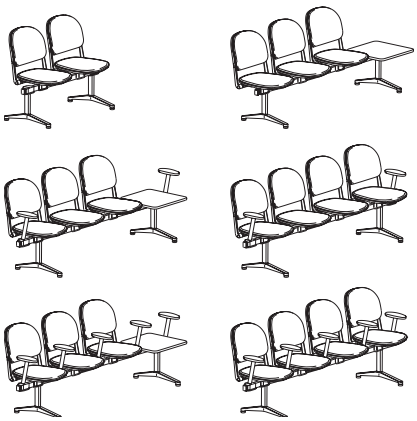

Torsion® Tandem Seating

For waiting and public areas, beam-mounted Torsion tandem offers comfort, adaptable configurations and easy maintenance.

Designed by Giancarlo Piretti, small-scale seat and clean lines make Torsion tandem discreetly compatible with any setting - offices, lobbies, airports and more.
