Torsion® Stack Chair

Torsion stack chairs provide unexpected comfort at a price comparable to fixed-back stack chairs.

No one expects a stack chair to flex. Torsion's back flex is achieved by the torsion mechanism, which creates gradually increasing resistance over the full 12 degrees of back flex.

Torsion stack chairs offer unparalleled comfort, which makes them perfect for long meetings or lectures.

From healthcare, to education to business, Torsion stack chairs and the entire Torsion seating collection (task chairs, task stools, and tandem seating) provide design continuity in any environment.

Fold away the tablet arm. When the tablet arm is not needed, fold it away to create a general use guest chair. G tablet only – does not stack.
