POWDERCOAT, TEXTURED POWDERCOAT, AND ANODIZED ALUMINUM

There may be slight variations in color, texture, and finish between printed samples and actual product.

Unlimited colors are available for branding needs or culture initiatives. For better matching, refer to Benjamin Moore® or Sherwin Williams® swatch decks. KI Wall vendors match colors based on provided numbers or samples sent to:

KI Wall
1330 Bellevue St.
Green Bay, WI 54302

When matching metallics, adjustments may be made for consistency. Custom colors require customer approval four weeks before shipping to avoid delays. There is an additional setup charge for custom powdercoat colors on projects under 200 linear feet.

Contact your sales representative for more information on custom color matching.

Finish Color Availability

- Though custom color matches are available and provide a personalized touch, they may require an upcharge and extended lead times.

Finish Color Variations

- Natural variations in wood veneers can affect texture, color, grain pattern, and finish penetration, resulting in differences in tone and character from printed samples. These variations are part of wood's inherent beauty and are not considered defects. All wood finishes darken over time, particularly cherry and maple.
- For accurate product representation and color approval, contact your sales representative for larger production samples, though exact matches cannot be guaranteed due to these natural variations.
