HEALTHCARE SOLUTIONS

URETHANE ARM
This arm option provides comfort, durability, and enhances infection control. All Jordan arms are designed to assist ingress and egress, with any easy-to-grip shape and size - and a forward height incline that better supports the sitter's movement and body weight as they move in and out of the seat.

WOOD ARM
Available in a range of finish colors. All wood components feature Krug's anti-microbial finish, which assists in reducing the spread of infectious germs, and inhibits fungal spore growth.

WOOD ARM WITH URETHANE CAP
The optional arm cap provides enhanced durability and protection for the arms. It is field replaceable if it becomes damaged or degraded.

UPHOLSTERED ARM
Combination upholstery (more than one upholstery cover within the same unit) is an option on all Jordan upholstered products. Components can be upholstered individually: seat cushions, back cushions, arm panels, front panels, back panel.

OTTOMAN
The adjustment lever is situated to allow both the user (while in the seated position) and the caregiver (while standing) to safely operate the ottoman function of the mechanism. The ottoman features extra padding to enhance comfort and circulation for larger, heavier legs.

BACK ADJUSTMENT
Situated to allow both the user (while in the seated position) and the caregiver (while standing) to safely operate the back-recline function, this lever reclines the back to a position of 128 degrees. The Bariatric Recliner can optionally be specified with a back recline to a Sleep/ Lay-Flat position.

SWING AWAY TABLET
The tablet has the ability to slide up and fold over and rotates 180°. The break away design allows for the tablet to be pushed away from the patient quickly in case of an emergency.

CASTER
Standard on Jordan Recliners are (4) 4" diameter of wheel swivel locking casters. The caster is locked both directionally and rotationally, keeping the recliner secure when locked.

Components (including mechanism) Field-replaceable if damaged or degraded
Life Time Warranty
GREENGUARD™ Certified

With a seat width of 28.5”, and a weight rating of 500 lbs., the Jordan Bariatric Recliners provide the scale, strength and mobility to accommodate larger patients and guests. Heavy-duty locking casters enable these patients to be safely moved. The mechanism provides four positions, and an optional (and additional) lay-flat position can also be specified. Special foam has been used to provide additional support and durability on this product.

Bariatric furniture is subject to very intensive use. Jordan Bariatric Recliners are made with heavy-duty materials and components, but should they become damaged or degraded, individual components can be replaced (including the mechanism), and the product can be specified with replaceable upholstery covers.
