InFlex Tablet Chair

INFLEX TABLET CHAIR:
Color coordinates the classroom.

InFlex designer Giancarlo Piretti created a distinctive multipurpose chair with copious color choices – including a variety of matching frame colors for a hip, monochromatic look. But InFlex also offers multiple tablet surface and edge color options.

Each tablet arm is available in seven laminate colors that are as unique as their names; names like Cocobala, Kensington Maple and Pearl Silver. Trim the arm with one of five edge colors – black, chocolate, slate, bisque and pebble.

Three tablet arms are available: standard right and left, and oversized right. Tablet options are available with casters.

All told, thousands of upholstery options, 17 versatile plastic colors and nine smart frame finishes make InFlex the most colorful choice for the classroom.

Edge Colors

Black | Chocolate | Slate | Bisque | Pebble

Laminate Surface Colors

Black | Cocobala | Graphite Nebula | Grey Nebula | Pearl Silver | White Sand | Kensington Maple

SitOnIt • Seating™

INFLEX | The Best Long-Term Investment

InFlex easily passed an 80,000 cycle test with less than ½ inch deformation.

A competitor's 4-leg flex chair suffered a catastrophic failure of the entire back and could not complete the test.

A competitor's sled version did not fracture, but became permanently deformed, rendering the chair useless.

VERTEBRAE DESIGN IS BUILT TO LAST

Leaning back in her chair, she listens to the instructor. Bending forward, she types a note on her laptop and sinks back into the chair, eyes on the instructor. On a classroom chair this typically occurs every 7½ minutes, eight hours a day, and five days a week. For five years.

If she's sitting in a SitOnIt Seating InFlex multipurpose chair, after five years the chair is still going strong. Lower cost flex chairs from the competition simply don't hold up to long term stress.

With its unique vertebrae flex mechanism, InFlex may cost a little bit more, but it delivers the lowest total cost of ownership. We tested InFlex and some competitors' chairs in an 80,000 cycle Flex Test simulating five years of use. The test results are startling. See the results at the left.

Test results are on file and available upon request.

SitOnIt Seating melds a stunning Giancarlo Piretti design with an innovative flex-back disc system emulating the human back. The chair follows the spine's natural curve to deliver ergonomic, flexible back support. The collection is both comfortable and ergonomically correct.

INFLEX

The Best Long-Term Investment

Flex-back

PROVEN DURABILITY OVER TIME

This test is required to meet ANSI/BIFMA requirements. Here's how the test works:

1. The initial back position is measured before testing:
   - Sample is placed with back legs against a wall or other flat vertical surface.
   - The distance from the top rear-most surface of the chair back to the flat vertical surface is measured and recorded.
2. Back Durability Cyclic (ANSI-BIFMA x5.1-2011) test is performed with a 300 lb. load and photos are taken.
3. Testing is stopped halfway through cycling (40,000 cycles) and step 1 is repeated with the result recorded.
4. The test is completed and step 1 is repeated with the result recorded.
5. Post-test photo is taken.

In addition to the ANSI/BIFMA back durability test, we test the structural integrity of a chair when subjected to cyclic loading. It simulates a person rocking forward and backward in the chair. This demonstrates the ability of the chair to withstand the stress that occurs when a user exerts rearward pressure on the chair back. In this test, InFlex outperforms ANSI/BIFMA standards. And the competition.

SitOnIt • Seating™

Flex appeal with a modern look.

Flex back chairs offer unparalleled comfort in the classroom, café, or auditorium. With the rigors of daily use, the chair must perform, both initially and over time. Like all SitOnIt Seating products, the InFlex collection is built to last. Every component meets and exceeds ANSI/BIFMA standards. The Lifetime Warranty further protects your investment, ensuring complete satisfaction into the future.

ANSI/BIFMA

SitOnIt Seating is a member of the Business and Institutional Furniture Manufacturer's Association (BIFMA). Tests developed by BIFMA and approved by the American National Standards Institute (ANSI) determine the strength and durability of seating. Although testing is not a warranty or guarantee, our products meet or exceed BIFMA and ANSI standards.

For a strong and durable multipurpose chair that protects your investment over time, choose InFlex.

COLLABORATIVE PRODUCTS

Feature Spotlight

InFlex Task Chair

MULTIPURPOSE CHAIRS: Great features that enable comfortable collaboration.

People spend more time collaborating today than ever before. Working with others requires a completely different set of postures, and thus, a completely different kind of chair – one that helps keep you comfortable and focused in collaborative settings like conference and training rooms.

Here's why SitOnIt Seating light task and multipurpose chairs are great for collaboration:

Flexible Comfort
InFlex emulates the human spine, delivering ergonomic back support and long lasting comfort.

Adjustability
The swivel tilt mechanism available for Anytime and Relay allows the user to lean back to think or read, or lock in the upright position for a quick intensive spurt. Then, spin around for a quick meeting.

Easy to Handle
Anytime and OnCall offer pull handles and are good to go whenever you need to interact with team members.

Mobile
SitOnIt chairs are offered with casters and glides that make it easy to move on hardwood, laminate, or carpeted surfaces for ad hoc team interaction or group huddles. Afterwards, the chairs can be returned to the original arrangement quickly.

Lightweight
A light task chair should be - light. SitOnIt Seating light task chairs weigh as little as 12 lbs., making them easy to move around.

Perfectly Designed
Anytime, InFlex and Relay were created by some of the world's best furniture designers.

SitOnIt • Seating™

STOOLS | Feature Spotlight

SitOnIt Stools:
Café and task stools that complement task and side chairs.

Stools are the height of fashion for lunchrooms and cafeterias, high-topped work stations, labs and drafting areas.

Focus Café Stool

Focus Task Stool

SitOnIt has stools that match task and side chairs across many of our collections. Task stools come with basic (B), posture back (P) or intensive (I) mechanisms and can be found in plastic, mesh, upholstered back or fully upholstered models.

Task stools sit on a 5-star base while café stools stand on 4 legs or a sled base. The Focus Side, Anytime, Freelance, InFlex and OnCall collections include café stools.

Extra-large casters and steel reinforcement are standard for 24/7 HD models. Non-Stop Heavy Duty, @Work and TR2 HD stools are rated for 350 lbs. weight capacity.

Another way to configure a stool is through a stool kit or extended stool kit for a task chair. The Focus Work, InFlex, Knack, OnCall, ReAlign, Sona and Volley collections all offer these task chair options.

Most stools are midback, but both midback and highback styles are available in Focus Work.
