# Quick Installation Guide

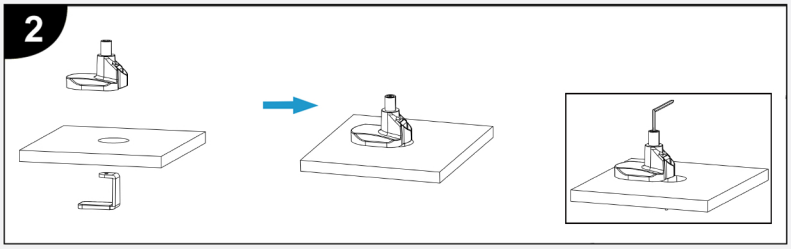

## Executive Series Single Monitor Arm Installation

### Base Installation - Clamp Style

**Step 1 -** Fit clamp over the edge of the desk in desired location and tighten using provided allen wrench as shown in Figure #1.

**Step 2 -** Clamp may also be fitted into the cable guide hole featured on some desks. Insert the bottom half of clamp into opening and tighten into place as shown in Figure #2.

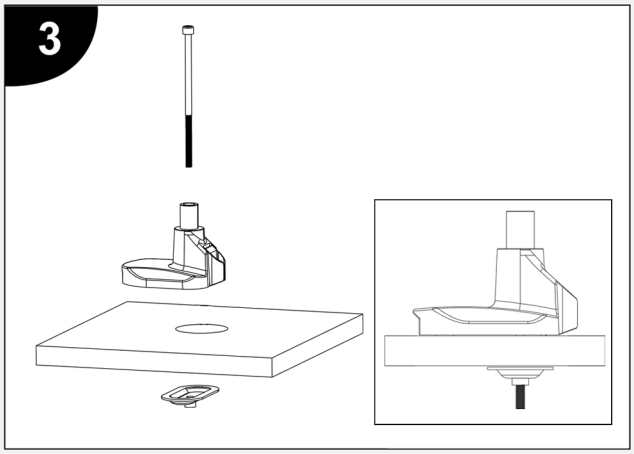

### Base Installation - Grommet Style

**Step 1 -** Locate and mark installation site. Drill pilot hole.

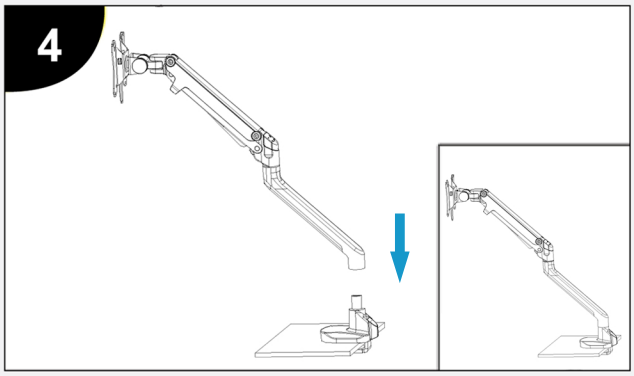

**Step 2 -** Separate lower section of clamp by removing center bolt and set aside.

**Step 3 -** Install long bolt through base and desk top. Thread grommet plate over bolt and tighten with grommet nut as shown in Figure #3.

### Arm Installation

**Step 1 -** Install arm onto base. Note upper and lower arm sections should be secured together using provided screw as shown in Figure #4.

# Quick Installation Guide

## Executive Series Single Monitor Arm Installation

### VESA Bracket/Monitor Installation

1. Using the enclosed Monitor Screws, install screws in the top 2 VESA holes only.
2. For monitors with a 100mm x 100mm hole pattern, align screws with the slots on the top of the VESA Bracket and slide into place.
3. Install remaining 2 monitor screws and tighten all 4 to secure your monitor.
4. If your Monitor has a 75mm hole pattern you will use the 4 inside holes on the VESA Bracket.
5. PC monitors up to 29" and 17.6lbs/ 8kg.

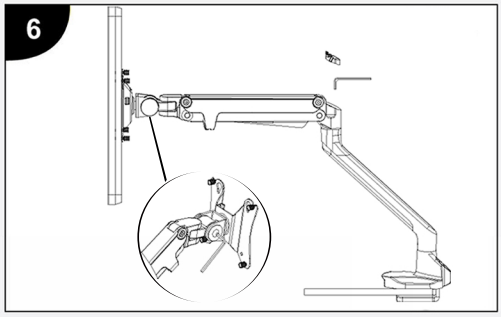

### Adjust Arm Tension

**Step 1 -** In order to adjust the tension of the monitor arm according to the weight of the monitor the arm must be lowered to a horizontal position as shown in Figure #6.

**Step 2 -** Using the provided allen wrench adjust the arm's tension to hold your arm in the proper position. Rotate the wrench counter-clockwise (+) to tighten the arm for heavier monitors. And rotate the wrench clockwise (-) to loosen the arm for lighter monitors.

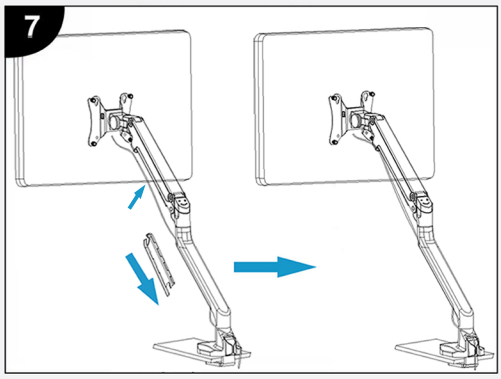

**Step 3 -** Using the provided allen wrench to tighten the screws for heavier monitors.

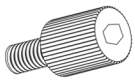

### Cable Management

Monitor cables may be threaded through the upper and lower arm sections in order to complete the installation. As shown in Figure #7.

Note: An allowance of extra cable should be left to accommodate arm movement.
